

WHY NTS DATA MANAGEMENT?

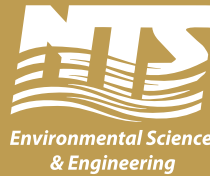

NTS understands that the success of your project depends on reliable data. Our field scientists collect your data. Our data-management specialists and GIS specialists work together to make certain your data is online, on-time, and meets the quality your project requires. Our environmental scientists & engineers use this data to identify problems and, more importantly, solutions for your project. NTS is full-service data management.

How does it work?

Our web-based GIS system is based on ESRI's GIS Server 10.1. Not only is it fast and secure, there is also no software/hardware required and it works on any browser or mobile device!

Access from Anywhere, Anytime

NTS is the Iron Range's only locally-based, full-service environmental science and engineering company. Headquartered on the Iron Range since 1985 with a focus on northeastern Minnesota, we are committed to providing world-class science and engineering to our local customers. We believe in sustaining the local economy by utilizing local workers and vendors.

Our services include environmental & geotechnical consulting; engineering & engineering support services; data management; water resource services; and site assessment & investigation. These services are provided to industrial, municipal, and governmental clients.

PUTTING YOUR DATA TO WORK

Geographic information system (GIS) technology gives you a framework for gathering, organizing, sharing, and analyzing spatial information. You can use GIS to see how things work together, allowing you to make informed decisions.
